THE NINTENDO® 64 CONTROLLER

CONTROL STICK FUNCTION

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional +Control Pad.

When turning the Control Deck Power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the top diagram, left) when the power is turned on, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the bottom diagram, left); then press START while holding down the L and R Buttons.

The Control Stick is a precision instrument; make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center™.

HOLDING THE NINTENDO 64 CONTROLLER

We recommend that you use the hand positions shown at right. By holding the controller like this, you can operate the Control Stick freely with your left thumb. Using your right thumb, you can easily access the A, B and C Buttons. Place your left index finger where it feels comfortable, but not in a position where you might accidentally press the Z Button on the back of your controller.

CONNECTING THE NINTENDO 64 CONTROLLER

W™ **WrestleMania® 2000** is a 4-player game. Insert all four controllers before turning the Control Deck Power on.

- **Name** – To enter a name, move the cursor around the alphabet with the +Control Pad, and then press the A Button to confirm. Select DECISION to return to the Profile/Music screen.

EDIT MENU (CONT'D)

MOVES

Now that your Jobber has his "look" and entrance music, he needs to learn a few moves. Without making any adjustments, you can already use your wrestler in a match using his Default moves. But to truly set him apart from the rest of the superstars, take some time and assign his own unique "style" by choosing from the thousands of moves at your disposal.

First, select a category to begin with by pressing the +Control Pad **↑/↓**, then press either the A Button or START. If the category has sub-categories, select one using the same method.

Each category of moves has its own set of situations, and each situation needs a move assigned to it. TECHNIQUE contains all the moves in the game. By changing a move in the other categories, it will automatically change in TECHNIQUE.

1. Select a situation (for example "weak arm striking") by pressing the A Button, then press the C **◀** Button to Preview the moves.
2. Press the +Control Pad **↑/↓** until you see a move you like, then press the A Button.
3. Finally, press the A Button again to save the command to your Jobber's list of moves.
4. Each move has a power rating. E signifies a weaker move, while A is the strongest move. If an X is under KO, then you can Knockout an opponent. With a red X under D, the move will draw blood. Finally, an S in the right column means the move is a submission hold, while a P means the move will pin the opponent.

EDIT MENU (CONT'D)

When a move has been selected for a situation, the situation changes colors, letting you know that you've already made a selection there. Press the C \blacktriangleright Button to make that move a Favorite of the grappler. When he is CPU Controlled, he will use that move more often than the other moves.

As the process of assigning moves to a newly created wrestler can take a lot of time, you can save the wrestler at any time by highlighting DECISION and pressing the A Button.

FIGHTING STYLE

Aside from the moves and the taunts, Fighting Style is where a wrestler's true personality emerges. Taking care of every detail, down to how he reacts to blood, gives you control over whether your created wrestler will be a Jobber for life or a superstar in his own right.

Weight Class – Choose either HEAVY, LIGHT-HEAVY

Counters/Reversals – Select the style of reversals – HEAVY, LIGHT-HEAVY, MARTIAL ARTS.

Jumping Distance – Choose how far the Jobber can jump – SHORTEST, SHORT, NORMAL, LONG, LONGEST.

EDIT MENU (CONT'D)

Offensive Strength – With a total of 15 points, assign how much strength each body part has to damage an opponent with.

Defensive Strength – Again using 15 points, decide how much defensive strength goes to each body part. Keep in mind, the more ~~strength~~ ~~strength~~ his legs take, the slower your wrestler will move.

Ally/Enemy – Assign enemies for your wrestler, as well as a Valet or Manager to enter the ring with him or her.

When your wrestler is complete, don't forget to save him by highlighting DECISION and pressing the A Button.

ROAD TO WRESTLEMANIA®

Within the Road to WrestleMania game mode, you will be able to unlock the majority of the hidden wrestlers to use in the other game modes. Be prepared to go through an entire season of Cage matches, Tag Team events, Singles matches and more as you make your way through the ranks of the top superstars of the World Wrestling Federation®. As enemies try to interfere with your matches, you will need to compile a staggering Win/Loss ratio and be the keeper of a few belts to become the number one contender.

Select an empty block to begin a NEW GAME. Only three Road to WrestleMania games can be saved at one time.

Next, select a wrestler and choose a Tag Team partner. You will not always be involved in Tag Team events, but just in case any arise on the Road to WrestleMania, you will have a partner to smack down with.

As you progress through the season, *WWE WrestleMania 2000* will compile stats for your wrestler based on Singles and Tag Team winning percentages. Also, each belt you've won will be shown, along with how many times you've had to defend that title. By selecting CHAMPION from the Statistics screen, you can keep track of the current title holders.

PAY-PER-VIEW

Set up your own Pay-Per-View events, complete with a full card of matches from Royal Rumble® to 3 Way and Cage matches, with as many *WWE* Superstars as you can!

First, give your Pay-Per-View a name and date and set the stage by giving it a Hall (Arena). Next, select DECISION to advance to the Pay-Per-View setup screen. Now, select NEW PROGRAM to plan the first match of the evening.

Choose the type of match, decide if a Belt is on the line, choose the opponents, set the rules and finally give the match a name. Once complete, select DECISION and repeat the process to build the second match on the card.

Repeat this up to 15 matches for the Pay-Per-View, and then select START and press the A Button to head to the Arena.

Note: Your created Pay-Per-View cannot be saved to a Controller Pak.

If you use an created Belt while in the Pay-Per-View mode, the Belt cannot be moved to a Controller Pak until the Pay-Per-View has been erased. Select the saved Pay-Per-View, highlight ERASE and press the A button. Now your created Belt will be available to move to a Controller Pak.

ROYAL RUMBLE®

The ultimate match for any wrestling fan, the Royal Rumble®, consists of up to 40 Superstars running into the ring one after the other each time an opponent is defeated. Do you have what it takes to go the distance against 39 superstars?

To set up a Royal Rumble, first decide which arena the Rumble will be held in; then how many Human-controlled or CPU-controlled players will be involved. Decide if a belt will be on the line, and then figure out how many superstars will participate in the event. Finally, select the wrestlers, customize the rules and head to the ring for some hard-hitting action.

CREATE A BELT

You can create your own belt to fight for, and defend, in Exhibition, King of the Ring™, and Royal Rumble®. Also, you can put a different belt on the line for each match in your own Pay-Per-View event!

To create a Belt, select NEW BELT at the top of the screen. Give the belt a name and select DECISION. Now use the Control Pad $\uparrow\downarrow$ to decide what the belt will look like, then press the A Button to confirm. Once a belt is created, you can put it on the line in any game mode – except Road to WrestleMania®, which features the actual belts of the World Wrestling Federation®.

To walk through a match without any belts on the line, select NON-TITLE MATCH at the bottom of the screen. Select CONTROLLER PAK to find a created belt that has been saved to the portable Controller Pak. See DATA PAKS for more information.

move and press the A Button. Finally, choose an empty slot to move it to, and press the A Button to confirm. Select ERASE to completely delete the belt data from either the Game Pak or the Controller Pak. Highlight the belt to erase, then press the A Button to confirm.

Superstar Data – As with the Belt Data, created and edited wrestlers can be moved from the Game Pak to the Controller Pak, and vice versa.

Select CHECK, highlight a created grappler, and then press the A Button to view all the created information for that superstar. You will not be able to make any changes to the created superstar while in the DATA menu.

Select MOVE to put a created superstar onto a Controller Pak from the Game Pak. Now, you can create some high-profile Talent, carry the superstars with you on a Controller Pak, and challenge anyone on their own turf. In order to use a created superstar, you need to move him from the Controller Pak to the Game Pak before heading to the squared circle.

CLONE copies a created wrestler into any empty slot. If you've created the biggest, baddest Superstar known to man and want to make a copy, select CLONE and highlight the grappler; then press the A Button. Now, use the Control Pad to find an empty slot, on either the Game Pak or Controller Pak, and press the A Button to copy the superstar to the free spot.

When the changes have been made successfully, highlight DECISION and press the A Button to confirm. If you have made a mistake and don't want the changes to be in effect, highlight CANCEL and press the A Button.

Note: While in Belt Data, you will be unable to erase or move a belt that is currently in use by a saved Pay-Per-View event. See page 23 for more information.

TRIPLE H™

Height: 6'4"

Weight: 246 lbs.

Unafrid of making enemies en route to the top, HHH takes no prisoners and refuses no challenges.

Blond, bald, big, small – All have felt the wrath of this multi-time World Wrestling Federation Champion.

CONTROLLER PAK® & RUMBLE PAK®
